

pge : Patient Gateway Endpoint

thirdPartyService : ThirdPartyService

1: saveNewTokens(newTokens : List<TokenPackage>) : void

```
sequenceDiagram
    participant pge as pge : Patient Gateway Endpoint
    participant thirdPartyService as thirdPartyService : ThirdPartyService
    pge->>thirdPartyService: 1: saveNewTokens(newTokens : List<TokenPackage>) : void
```

The diagram is a UML sequence diagram with two lifelines. The first lifeline, on the left, is labeled 'pge : Patient Gateway Endpoint'. The second lifeline, on the right, is labeled 'thirdPartyService : ThirdPartyService'. A message arrow points from the first lifeline to the second. The message is labeled '1: saveNewTokens(newTokens : List<TokenPackage>) : void'. On the first lifeline, there is a small rectangular activation bar at the start of the message. On the second lifeline, there is a small square activation bar at the end of the message.
