

pge : Patient Gateway Endpoint

thirdPartyService : ThirdPartyService

1: saveNewTokens(newTokens : List<TokenPackage>) : void

```
sequenceDiagram
    participant pge as pge : Patient Gateway Endpoint
    participant thirdPartyService as thirdPartyService : ThirdPartyService
    pge->>thirdPartyService: 1: saveNewTokens(newTokens : List<TokenPackage>) : void
```

The diagram is a UML sequence diagram with two lifelines: 'pge : Patient Gateway Endpoint' on the left and 'thirdPartyService : ThirdPartyService' on the right. A solid horizontal arrow points from the pge lifeline to the thirdPartyService lifeline, labeled with the message '1: saveNewTokens(newTokens : List<TokenPackage>) : void'. Both lifelines have dashed vertical lines extending above and below the message arrow. On the pge lifeline, there is a small rectangular activation bar that starts at the point where the message arrow originates. On the thirdPartyService lifeline, there is a small rectangular activation bar that ends at the point where the message arrow terminates.
